PROJECTS

Portfolio Website

HTML / CSS / JavaScript

- Built a responsive personal portfolio website to showcase skills and projects.
- Implemented sections for About Me, Projects, and Contact.
- Designed with clean UI/UX principles for readability and navigation.
- Applied responsive design techniques to ensure compatibility across devices.
- Deployed online to demonstrate ability to create and host real-world projects.

Amazon Clone

HTML / CSS

- Built a fully responsive e-commerce landing page using HTML and CSS.
- Implemented product listing layout with cards and sections similar to Amazon.
- Created a navigation bar with search bar, categories, and links.
- Designed a hero/banner section for featured products.
- Applied CSS styling and flexbox/grid for layout and responsiveness.
- Focused on clean UI/UX, ensuring content is organized and easy to navigate.
- Learned to replicate real-world website designs and structure content efficiently.

Netflix Landing Page Clone

HTML / CSS

- Built a responsive landing page clone of Netflix homepage using HTML & CSS.
- Implemented header, hero section, product cards, and footer for realistic layout.
- Applied CSS Flexbox and Grid to align content and ensure responsiveness.
- Practiced replicating real-world website designs and organizing content efficiently.
